

Harbor Grove AI-Ready Data Decision Handoff

- Run: DATA-RV-PILOT-001 1.2.8; DATA-SYN-20260830-007; synthetic reader; local v2 revision.
- Initial lineage: DATA-A-INITIAL-WORKBOOK-v1.md; DATA-A-INITIAL-READINESS-ASSESSMENT-v1.md.
- Revised inputs: DATA-A-REVISED-WORKBOOK-v1.md; DATA-A-REVISED-READINESS-ASSESSMENT-v1.md.
- State: REVISED COMPLETE; FROZEN locally for this walkthrough.
- Governing manifest: DATA-A-REVISED-ARTIFACTS-SHA256SUMS-v1.txt.
- Detached verification: DATA-A-REVISED-FREEZE-VERIFICATION-v1.md.
- Handoff verification: DATA-A-HANDOFF-FREEZE-VERIFICATION-v1.md.
- Provenance is immutable metadata; layout proof is recorded separately.

1. Decision and beneficiary

- **Decision:** Defer the offline AI pilot for HG-03/HG-04 no-heat support drafting.
- **Beneficiary:** Trained support agents, only after they can review a current, scoped policy draft.

2. Allowed and withheld

- **Allowed:** Search only the current approved no-heat policy for the agent's building.
- **Withheld:** Resident notes, payment/disability data, vendor commentary, historical narratives, and out-of-scope buildings.

3. Evidence and uncertainty

- Constructed facts show mixed v2/v3 retrieval, missing effective-date metadata, and excessive service-account scope.
- Dry check observed obsolete escalation timing and a restricted HG-11 note in context.
- **Unknown:** Whether restricted content reached logs/output and when v3 corrections reach the index.

4. Ownership, risk, and action

- Meaning owner, index operator, and privacy/incident owner are **UNASSIGNED**; governance must assign them.
- **Largest unacceptable outcome:** Obsolete emergency instruction or disclosure of restricted resident information.
- Quarantine the candidate, narrow entitlements, rebuild metadata, and run stale-version and HG-11 negative tests.
- Reconsider only on versioned citations, correction receipts, and authorized privacy disposition.

5. Proof, gates, and limits

- Prove policy ID, version, effective interval, scope, and correction propagation in the served citation.
- Model, action-authority, privacy, and release gates remain unresolved; this synthetic exercise proves neither readiness nor safety.
